🎯 Course Objective & Next Steps:

The goal of this course is to prepare you for the job market as a Junior SAP ABAP Developer, and to help you take your first solid step toward a successful career in this field – Insha’Allah.

Throughout the course, you will not only gain practical ABAP development skills, but you will also learn how to become a self-learner, how to adapt and grow in this vast ecosystem, and how to conduct effective research in a field where reliable resources are often difficult to find online.

At the end of the course, the instructor will also guide you on:

- How to continue your learning journey after the course,
- What to focus on next,
- And how to build a long-term self-study plan to advance in the SAP world.

This course is your launchpad – what comes next is in your hands.
